

# Car UnderSeal

Bitumen Emulsion Undersealer

## Description

A stabilized emulsified bitumen compound with special selected fibers.

## Uses

Car UnderSeal is a black thick and flexible coating that protects the underside of motor vehicles. This heavy duty coating protects against:

- Corrosion
- Dust barrier
- Some degree of sound proofing

## Substrate preparation

Surfaces should be free from dust, dirt, oil and grease. All dirt, rust, and oil should be removed thoroughly and allowed to dry before application of Car UnderSeal.

## Application

Apply 2 coat with stiff bristle brush or 2mm thickness with spray, working well into the surface.

A 24 hours drying period is recommended especially between coats when applying the Car UnderSeal with a brush.

A practical test to know if the Car UnderSeal has dried completely, is to rub the surface with a wet finger. It has thoroughly dried if no brown stain is produced.

## Packaging

Car UnderSeal comes in 4kg metal tin.

## Coverage

Average size Saloon car takes up to 15Kg.

## Storage

Car UnderSeal should be tightly sealed and stored in a cool, dark area. Shelf life of minimum 12 months.

## Equipment care

Clean all tools used immediately with water after use and if Car UnderSeal has dried, use paraffin, kerosene or white spirit.

## Safety Precautions

Car UnderSeal is a non-flammable, yet it can burn slowly if the surface is dry. Use protective clothing and eye wear when handling the product, if in contact with skin or eyes, wash with clean water and seek medical advice.

## Physical Properties

Heat Flow resistance - the non toxic cured film will not sag or flow when in contact with heat.

Resistant to:

- water, salt solutions, dilute acid and alkali.

Non-resistant to:

- oil, solvents, and detergent solutions.
