

PRECAST PRODUCTS

WATERPROOFING, FLOORING & CONSTRUCTION SOLUTIONS FOR ANY BUILDING PROJECTS

Precast concrete is a construction product produced by casting concrete in a reusable mold or "form", which is then cured in a controlled environment, transported to the construction site and installed.

The main advantages of precast technology include speed of construction, cost-saving and durability.

Some of Kenbro's precast products:

- Kerbs
- Channels
- IBD – Inverted drains/side slabs
- Shallow drains
- Slabs
- Louver Vent

Advantages of using Kenbro Precast products:

- High Abrasion Resistance
- Durable
- Long Life
- Easy Repair & Replacement
- Easy Subservice Maintenance
- Maintenance Free

		
<p>Kenbro Road Kerbs 900 x 250 x 125mm (65 Kg)</p> <p>Ensures that water flows to a drain without causing floods. Acts like a barrier.</p>	<p>Kenbro Road Channels 900 x 100 x 125mm (40 Kg)</p> <p>Helps to keep the paving blocks intact, as it acts as a support for a firmer fix and avoid movement.</p>	<p>Kenbro Paving Slabs 600 x 600 x 50mm (45 Kg)</p> <p>Beneficial for landscaped areas on residential or commercial. Used for foot paths.</p>
		
<p>Kenbro Shallow Drain 600x490x120mm(72Kg)/460x390x100mm(49Kg)</p> <p>Used to drain shallow storm water.
